Experience

GNU/LINUXUSERS' GROUP,- Junior Member

FEB 2022 – Present

As a junior member, I have worked in every event's projects including deploying backend of club's event. I also work as a Graphic Designer in most of the events .

Projects

Content Management System (Blog Website)

It is built using django, HTML, CSS, where users can post their blogs, can comment on other blogs. Users can also delete and edit their blogs.

Song Recommendation Engine(Muzingle)

It is built using K-means clustering algorithm , spotipy API and scikit-learn. It is a beginner friendly Machine Learning project. It searches songs on users input and returns a list of songs related to given song.

Extracurricular Activities

- Gold Medalist in 100m sprint race
- Winner of Inter school volleyball Tournament.
